Garbage Commander

#masterthecan

Having a long, steep drive-way and getting the larger trash bins to the road can be very time consuming, physically strenuous and dangerous especially in bad weather. You would either have to lift the cans into a trailer or try bungeeing the handle around the ball of the receiver hitch, spilling garbage or risk getting injured all in the name of getting the trash out.

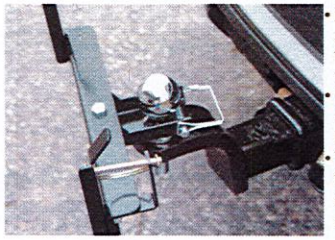
FOUR INSTALLATION HOOK STYLES:

Receiver Mounted Hook

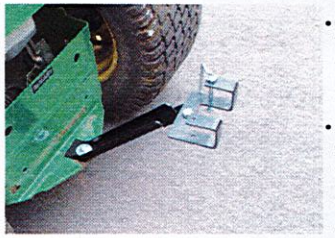
- Works with any vehicle, ATV / UTV, golf carts that have a 2" receiver or use the adaptor for 1 1/4".
- The swiveling top rail allows trash bin to trail around curves without binding like a trailer
- Multiple hook settings assuring the best fit for either 64 - 96 gal wheeled trash cans
- The Receiver upright has 6" of adjustability for achieving thy optimum operating height

Ball Mounted Hooks



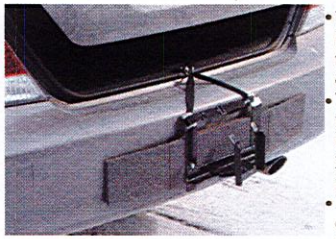
- Patented retainer base slips under a stand 1 7/8" or 2" trailer ball and is secured with a 3/8" retainer pin
- Works with any vehicle, ATV / UTV, golf carts that have a 1 7/8" or 2" ball.
- The swiveling base allows trash bin to trail around curves without binding like a trailer

Bolt Mounted



- Once bolted onto the ATV or Lawn Tractor the upper hook support arm will still pivot allowing cans to be hauled like a trailer would without binding.
- Heavy duty construction using 1/8" steel that is laser cut and formed for consistent quality. Then parts are powder coated with a matte black finish for a durable finish. The 45-degree angle will reduce the arm weight to 75 lbs.

Bumper Mounted



- No Hitch needed, works by hooking the carrier to the center latch on most cars and SUV's
- Three layers of foam padding protect cars bumper, side pads extend 29" to keep cans handle from hitting the bumper
- Heavy 11 gauge steel construction, laser cut formed & powder coated for durability

NEED MORE HELP?

The Can Coupler

- Attach more than one garbage can
- Made in two pieces so arm swivels allowing cans to move without binding around curves.
- Can couplers come with two quick fastening PTO clips to securing two cans together

The Combo Hitch

- Great for lawn mowers, ATV / UTV
- Lightweight - Quickly and easily attaches and removes in seconds
- Haul both pin hitched or handled lawn & garden equipment without removing the ball hitch
- Patent # 9,566,837 B1

MOUNTAIN HOOK:

The cans handle is cradled around our U channel and secured in place using a retaining pin. This makes it impossible for the cans handle to lift off during transportation.
